"The HMMWV has had an enduring role in the U.S. Army, U.S. Marine Corps and across the international ground forces community for decades," said Frank Simpkins, director, land forces programs, Northrop Grumman Technical Services. "By leveraging our customer mission and platform knowledge and assembling a best-in-class industry team, we believe Northrop Grumman has a tremendous offering that would appeal to every member of the global HMMWV community."

Northrop Grumman partnered with *Meritor Defense* and Pratt & Miller Engineering on the solution, which extends the life of the HMMWV while significantly lowering sustainment costs and increasing fuel efficiency.

"By combining the latest commercially available technologies from the automotive industry with our company expertise in systems engineering and ground vehicle sustainment, we believe our HMMWV offering delivers great value to all HMMWV customers," said Jeff Wood, director, vehicle modernization, Northrop Grumman Technical Services. "The benefit our solution provides to all global HMMWV fleets is an optimal balance between payload, performance and protection while lowering total life-cycle costs and delivering a platform that can once again effectively carry out myriad missions."

Northrop Grumman is a leading global security company providing innovative systems, products and solutions in unmanned systems, cyber, C4ISR, and logistics and modernization to government and commercial customers worldwide. Please visit www.northropgrumman.com for more information.
