Dave Keffer
Corporate Vice President and Chief Financial Officer
Forward-Looking Statements

This presentation and the information we are incorporating by reference, and statements to be made on the earnings conference call, contain or may contain statements that constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “will,” “expect,” “anticipate,” “intend,” “may,” “could,” “should,” “plan,” “project,” “forecast,” “believe,” “estimate,” “guidance,” “outlook,” “trends,” “goals” and similar expressions generally identify these forward-looking statements. Forward-looking statements include, among other things, statements relating to our future financial condition, results of operations and/or cash flows. Forward-looking statements are based upon assumptions, expectations, plans and projections that we believe to be reasonable when made, but which may change over time. These statements are not guarantees of future performance and inherently involve a wide range of risks and uncertainties that are difficult to predict. Specific risks that could cause actual results to differ materially from those expressed or implied in these forward-looking statements include, but are not limited to, those identified and discussed more fully in the section entitled “Risk Factors” in the Form 10-K for the year ended December 31, 2021 and from time to time in our other filings with the Securities and Exchange Commission (SEC). These risks and uncertainties are amplified by the global COVID-19 pandemic and the related effects on the broader economic environment, which have caused and will continue to cause significant challenges, instability and uncertainty. They include:

Industry and Economic Risks
- our dependence on the U.S. government for a substantial portion of our business
- significant delays or reductions in appropriations for our programs, and U.S. government funding and program support more broadly, including related to hostilities and other global events
- the use of estimates when accounting for our contracts and the effect of contract cost growth and/or changes in estimated contract revenues and costs, including as a result of labor shortages and/or inflationary pressures
- increased competition within our markets and bid protests

Legal and Regulatory Risks
- investigations, claims, disputes, enforcement actions, litigation and/or other legal proceedings
- the improper conduct of employees, agents, subcontractors, suppliers, business partners or joint ventures in which we participate and the impact on our reputation and our ability to do business
- changes in procurement and other laws, SEC and other regulations, contract terms and practices applicable to our industry, findings by the U.S. government as to our compliance with such requirements, and changes in our customers’ business practices globally
- environmental matters, including unforeseen environmental costs and government and third party claims
- unanticipated changes in our tax provisions or exposure to additional tax liabilities

Business and Operational Risks
- impacts of the COVID-19 pandemic (or future health epidemics, pandemics or similar outbreaks), including potential new variants, case surges or prolonged recovery periods, their effects on the broader environment, and varying related government requirements, on: our business, our ability to maintain a qualified and productive workforce, work slowdowns or stoppages, labor shortages, supply chain and logistics challenges, costs we cannot recover and liabilities for which we are not compensated, performance challenges (including cost and schedule), government funding, changes in government acquisition priorities and processes, government payment rules and practices, insurance challenges, and potential impacts on access to capital, the markets and the fair value of our assets
- cyber and other security threats or disruptions faced by us, our customers or our suppliers and other partners, and changes in related regulations
- our ability to attract and retain a qualified workforce with the required security clearances and requisite skills to meet our performance obligations
- the performance and viability of our subcontractors and suppliers and the availability and pricing of raw materials and components
- climate change, its impacts on our company, our operations and our stakeholders (employees, suppliers, customers, shareholders and regulators), and changes in laws, regulations and priorities related to greenhouse gas emissions and other climate change related concerns
- our exposure to additional risks as a result of our international business, including risks related to geopolitical and economic factors, suppliers, laws and regulations
- our ability to meet performance obligations under our contracts, including obligations that require innovative design capabilities, are technologically complex, require certain manufacturing expertise or are dependent on factors not wholly within our control
- natural disasters
- products and services we provide related to hazardous and high risk operations, including the production and use of such products, which subject us to various environmental, regulatory, financial, reputational and other risks
- our ability appropriately to exploit and/or protect intellectual property rights
- our ability to develop new products and technologies and maintain technologies, facilities, and equipment to win new competitions and meet the needs of our customers

General and Other Risk Factors
- the adequacy and availability of our insurance coverage, customer indemnifications or other liability protections
- the future investment performance of plan assets, gains or losses associated with changes in valuation of marketable securities related to our non-qualified benefit plans, changes in actuarial assumptions associated with our pension and other postretirement benefit plans and legislative or other regulatory actions impacting our pension and postretirement benefit obligations
- changes in business conditions that could impact business investments and/or recorded goodwill or the value of other long-lived assets

You are urged to consider the limitations on, and risks associated with, forward-looking statements and not unduly rely on the accuracy of forward-looking statements. These forward-looking statements speak only as of the date this presentation is first issued or, in the case of any document incorporated by reference, the date of that document. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.

This presentation also contains non-GAAP financial measures. A reconciliation to the nearest GAAP measure and a discussion of the company’s use of these measures are included in this presentation.
We earn trust, act with ethics, integrity and transparency, treat everyone with respect, value diversity and foster safe and inclusive environments.

Mission
At Northrop Grumman, our purpose is to protect national security and advance our understanding of our universe and how we sustain it for the future. We are transforming technology at speed to give our customers the ability to connect and protect around the globe.

Vision
We are exploring burgeoning research areas and creating revolutionary technology that will not only power the mission but also connect, advance and protect the U.S. and its allies. No matter what the future holds, the greater the problem, the more prepared we are to help solve it.

Values

We do the right thing
We earn trust, act with ethics, integrity and transparency, treat everyone with respect, value diversity and foster safe and inclusive environments.

We do what we promise
We own the delivery of results, focused on quality outcomes.

We commit to shared success
We work together to focus on the mission and take accountability for the sustainable success of our people, customers, shareholders, suppliers and communities.

We Pioneer
With fierce curiosity, dedication, and innovation, we seek to solve the world’s most challenging problems.
Northrop Grumman solves the toughest problems in space, aeronautics, defense and cyberspace to meet the ever evolving needs of our customers worldwide.

Our 90,000 employees are Defining Possible every day using science, technology and engineering to create and deliver advanced systems, products and services.

Technology company focused on global security and human discovery

*Non-GAAP financial measure. See Appendix.
We've been pioneering in space for over 60 years and we continue to push the boundaries of what’s possible. From the Lunar Module to the latest space telescopes, from national security launch systems and payloads to powerful airborne sensors and systems.

**Air**

We build some of the world’s most advanced aircraft. From the innovative B-2 Spirit stealth bomber to the groundbreaking X-47B, in addition to powerful airborne sensors and systems.

**Cyber**

We are a leading provider of full-spectrum cyber across land, air, sea and space. From preventing cyber attacks to securing military communications and giving our customers a decisive advantage, our capabilities are second to none.

**Land**

We provide critical logistics, sustainment and modernization services for everything from America’s emergency services infrastructure to combat vehicles on the battlefield.

**Sea**

We are a world leader in the design, development and production of naval systems. From sonar that can map the deepest depths of the ocean to anti-submarine systems and advanced electronic warfare, we’re constantly evolving to counter increasingly sophisticated threats at sea.

**Space**

We’ve been pioneering in space for over 60 years and we continue to push the boundaries of what’s possible. From the Lunar Module to the latest space telescopes, from national security launch systems and payloads to advanced communications satellites, our space capabilities are unrivaled.

**Multi-Domain**

In the future, more than ever before, mission advantage will go to military forces who can coordinate and act together across all domains. Observing, orienting, deciding and acting together, faster and with greater effect than their adversaries is the next-gen technological edge for Joint Forces.

**Advanced Weapons**

For decades, Northrop Grumman has protected U.S. forces and our allies by designing, developing and delivering weapons of increasing complexity and capabilities for expanded missions and domains.

**Technology company focused on global security and human discovery**
Four Operating Sectors at-a-Glance

- **Strike | Air Dominance | Battle Management and Control | Intelligence, Surveillance and Reconnaissance (ISR)**
  Leader in the design, development, production, integration, sustainment and modernization of advanced aircraft systems for the U.S. Air Force, the U.S. Navy, other U.S. government agencies, and international customers.

- **Integrated Battle Management Systems | Weapons Systems | Aircraft and Mission Systems Sustainment and Modernization**
  Leader in the design, development, production, integration, sustainment and modernization of weapon and mission systems for U.S. military and civilian agency customers, and a broad range of international customers.

- **Cyber | C4ISR Systems | Radar, Electro-optical/infrared (EO/IR) and Acoustic Sensors | Electronic Warfare Systems | Advanced Communications and Network Systems**
  Leader in advanced mission solutions and multifunction systems, primarily for the U.S. defense and intelligence community, and international customers.

- **Satellites and Payloads | Ground Systems | Missile Defense Systems and Interceptors | Launch Vehicles and Related Propulsion Systems | Strategic Missiles**
  Leader in delivering end-to-end mission solutions through the design, development, integration, production and operation of space, missile defense, launch and strategic missile systems for national security, civil, commercial and international customers.
2021 Highlights

Strong Financial Results

- 2021 Sales of $35.7B, Organic Sales* Growth of ~3%
- Expanded 2021 Segment Margin Rate* by 40 bps to 11.8%
- EPS of $43.54; Transaction-adjusted EPS* increased 8% to $25.63
- 2021 Cash from Operations of $3.6B, Transaction-adjusted FCF* of $3.1B

Balanced Capital Deployment

- Returned record $4.7B to shareholders via dividends and share repurchases
- Increased our dividend by 8%; 18th consecutive annual increase
- Retired over $2.2B of debt; credit ratings upgraded
- Invested $1.4B into the business via Capex

Distinguished ESG Record

- Reduced greenhouse gas emissions by 44% compared to 2010
- Scored in 96th percentile on S&P Global Corporate Sustainability Assessment
- Included in DJSI World Index for first time
- MSCI ESG Rating of AA

*Non-GAAP financial measure. See Appendix.

Consistent Return of Cash to Shareholders

Share Repurchases & Share Count

- Share count reduced by ~38% between 2012 and 2021
  - Average purchase price of $147
- Approximately $3.7B in 2021 Share Repurchases including
  - $2.0B ASR announced in 1Q21, retiring 6.1M shares
  - $0.5B ASR announced in 4Q21, retiring 1.3M shares

Dividends

- Dividend Growth CAGR of ~12% from 2012-2021
- 18 consecutive annual dividend increases
- Dividend increased 8% in May 2021
- Dividend increased 10% in May 2022

Average Purchase Price: $64, $87, $124, $164, $213, $240, $271, $312, $335, $344

Average Dividend Price: 10%, 11%, 15%, 14%, 13%, 11%, 20%, 10%, 10%, 8%
## ESG Highlights

### Environmental
- Committed to achieving **Net Zero GHG** emissions in our operations by 2035
- Published our First **TCFD Report**
- **Source 50%** of total electricity from renewable sources by 2030
- 49% solid waste diversion rate from landfill achieved in 2021

### Social
- Recognized corporate culture and ethics program
  - Diverse employee population including:
    - 25% Female
    - 18% Veteran
    - 36% People of color
    - 9% People with Disabilities
- Generated **$39M** in social value from Northrop Grumman, the Northrop Grumman Foundation and our employees
- Have an active, executive-led human rights working group and a [comprehensive human rights policy](#)

### Governance
- Board of Directors
  - **92%** Independent
  - **31%** Women on the board
  - **23%** People of color on the board
- 2021 Non-Financial Metrics part of Executive Compensation
  - People
  - Environment
  - Customer
  - Diversity
  - Environmental Sustainability
  - Employee Experience
  - Safety
  - Quality
  - Customer Satisfaction

### Published our First Northrop Grumman Overview
ESG Recognition

Investor Focused

- Member of DJSI World Index and North America Index
- AA rating from MSCI
- CDP Leadership score of A- in climate change questionnaire for 10th consecutive year

Reputation

- 3BL Media’s 100 Best Corporate Citizens
- CPA-Zicklin Index for Corporate Political Contributions
  - Only A&D company to receive a 100% Score
- Designated as a “High Performing Company” by Willis Tower Watson for high levels of employee engagement

Diversity, Equity & Inclusion

- DiversityInc’s Top 50 Companies for Diversity
- Disability Equality Index “Best Place to Work for Disability Inclusion”
  - Highest ranking for 8th year in a row
- Corporate Equality Index “Best Place to Work for LGBTQ+ Equality”
  - Received a 100% Rating

Leader in ESG
Aeronautics Systems Sector Overview

Strategy & Capabilities
Aeronautics Systems is a leader in the design, development, production, integration, sustainment and modernization of advanced aircraft systems for the U.S. Air Force, the U.S. Navy, and other U.S. government agencies, as well as international customers.

These aircraft systems support four mission areas: strike; air dominance; airborne battle management and control; and intelligence, surveillance and reconnaissance (ISR).

Northrop Grumman Overview
Program Descriptions & Acronyms

Aeronautics Systems

**Autonomous Systems**
- MQ-4C Triton, which provides wide area strategic ISR over vast ocean and coastal regions for maritime domain awareness to the U.S. Navy and Australia
- RQ-4 Global Hawk, which provides high resolution imagery of land masses for theater awareness and strategic ISR to the U.S. Air Force, Japan, and the Republic of Korea
- North Atlantic Treaty Organization (NATO) Alliance Ground Surveillance (AGS), a Global Hawk variant, for strategic ISR missions conducted in multinational theater operations
- MQ-8B and MQ-8C Fire Scout, ship-based, VTOL tactical ISR systems that provide situational awareness and precision targeting for the U.S. Navy

**Manned Aircraft**
- Development and production of the U.S. Air Force B-21 Raider long-range strike bomber, as well as modernization and sustainment services for the B-2 Spirit bomber
- Fuselage production for the F/A-18 Super Hornet and the F-35 Lighting II Joint Strike Fighter for use by U.S. and international forces
- E-2D Advanced Hawkeye battle management aircraft production for the U.S. Navy, Japan, and France
- E-8C Joint Surveillance Target Attack Radar System (JSTARS) aircraft sustainment and modernization for the U.S. Air Force
Defense Systems Sector Overview

Strategy & Capabilities
Defense Systems is a leader in the design, development, production, integration, sustainment and modernization of weapon and mission systems for U.S. military and civilian agency customers, and a broad range of international customers.

Major products and services include integrated battle management systems, weapons systems and aircraft and mission systems sustainment and modernization.

Defense Systems

Battle Management & Missile Systems
- Integrated Air and Missile Defense Battle Command System (IBCS) for the U.S. Army and Poland, which is a system that integrates sensors and effectors to deliver among the most advanced C2 systems for joint and coalition forces
- Counter Rocket, Artillery and Mortar (C-RAM), a set of systems used to detect and destroy incoming threats
- U.S. Navy’s Advanced Anti-Radiation Guided Missile (AARGM), a medium-range, air-to-surface missile, and its extended range variant, AARGM-ER
- Guided Multiple Launch Rocket System (GMLRS) propulsion and warhead subsystems for a surface-to-surface system used to defeat targets using indirect precision fires up to 70-plus kilometers
- Precision Guidance Kit (PGK), replaces conventional fuzes for artillery and mortar munitions and transforms them into Global Positioning System enabled precision guided weapons
- U.S. Army’s Mission Command Training Program (MCTP), providing the design, development and support to train and exercise senior Army Commanders on modern warfighting operations

Mission Readiness
- Global system sustainment and operations support for the F-35, B-2, E-8C JSTARS surveillance aircraft, P-3 Orion, KC-30A multi-role tanker, C-27J transport, Global Hawk and Triton programs
- Special Electronics Mission Aircraft (SEMA) intelligence, surveillance and reconnaissance support
- AAQ-24 sensor sustainment and repair for U.S. military customers
- APN-241 radar sustainment, repair and production for U.S. military and foreign military sales (FMS) customers

Mission Systems

Airborne Multifunction Sensors
• Airborne Early Warning & Control (AEW&C). The center piece of the E-7 AEW&C aircraft is the Multi-role Electronically Scanned Array (MESA) radar which enables 360 degree long range advanced air moving target indicator (AMTI) capabilities for Battle Management, Command and Control, and Maritime Surveillance
• F-35 fire control radar and Distributed Aperture System (DAS), which provides 360 degree field of view tracking, identifying, missile warning and night vision capabilities
• LONGBOW Fire Control Radar (FCR), which provides fire control radar capabilities for the global AH-64 helicopter fleet
• Scalable Agile Beam Radar (SABR), an electronically scanned array fire control radar system for F-16 aircraft

Maritime/Land Systems & Sensors
• Surface Electronic Warfare Improvement Program (SEWIP) Block III, which protects surface ships from anti-ship missiles, provides early detection, signal analysis and threat warning
• Ground/Air Task Oriented Radar (G/ATOR), a mobile multi-mode active electronically scanned array
• Littoral Combat Ship Mission Module Integration, which provides engineering design, support and production of mission modules for U.S. Navy littoral combat ships
• DDG Modernization, which is comprised of several subsystems to support modernization of Arleigh Burke-class guided missile destroyers including Integrated Bridge and Navigation Systems (IBNS) and ship control systems
• Offshore Patrol Cutter (OPC), the integrator for CSISR systems on the U.S. Coast Guard OPC including integrated bridge, navigation, command and control, computing network, machinery and propulsion control

Navigation, Targeting & Survivability
• LITENING Advanced Targeting Pod, an electro-optical infrared sensor system for targeting and surveillance that enables aircrews to detect, acquire, identify and track targets at long ranges
• Large Aircraft and Common Infrared Countermeasures (LAIRCM, DoN LAIRCM, CIRCM) systems, which protect large aircraft as well as rotary wing and medium fixed wing aircraft from infrared missiles using advanced laser technology
• APR-39 DV(2) and EV(2) Radar Warning Receiver programs, which produce a digital radar warning receiver for the U.S. Army, Navy and Marines
• AC/MC 130J Radio Frequency Countermeasures system, which provides superior situational awareness and better enables aircraft survivability in operationally relevant environments
• Embedded Global Positioning System (GPS) / Inertial Navigation Systems-Modernization (EGI-M) program, which provides state-of-the-art airborne navigation capabilities with an open architecture that enables rapid responses to future threats
• UH-60V Black Hawk integrated mission equipment package, which modernizes the U.S. Army’s Black Hawk helicopters with a glass cockpit, including an integrated computational system, visual display system and control display units, extending the life and mission capabilities of the UH-60 platform

Networked Information Solutions
• Battlefield Airborne Communications Node (BACN), one of the first airborne gateway systems that allows platforms to communicate and securely share data
• F-35 Communications, Navigation and Identification (CNI) integrated avionics system, which provides secure communications and interoperability capabilities
• Joint Counter Radio-Controlled Improvised Explosive Device Electronic Warfare (JCREW), a software-programmable jammer that provides protection from improvised explosive devices (IEDs)
• Exploitation and cyber programs, which provide cyber and intelligence domain support through unique intelligence and cyber capabilities
• Airborne Signals Intelligence Payload (ASIP), which delivers key signals intelligence capabilities to the warfighter by detecting, identifying, and locating radar and other types of electronic and modern communication signals
Space Systems Sector Overview

Strategy & Capabilities
Space Systems is a leader in delivering end-to-end mission solutions through the design, development, integration, production and operation of space, missile defense, launch and strategic missile systems for national security, civil government, commercial and international customers.

Major products include satellites and payloads; ground systems; missile defense systems and interceptors; launch vehicles and related propulsion systems; and strategic missiles.

1 See Page 36 — “Financial Guidance” regarding the company’s underlying assumptions, judgments and select factors that can affect the company’s ability to achieve guidance or meet expectations.

2 Non-GAAP financial measure. See Appendix.

3 Total Net FAS/CAS pension adjustment is presented as a single amount consistent with our historical presentation, and includes $170 million of expected CAS pension expense and $370 million of FAS pension service expense, both of which are reflected in operating income. Non-operating FAS pension benefit of $1,510 million is reflected below operating income, and the total net FAS/CAS pension adjustment is $1,310 million.

4 As usual, financial guidance does not include any future gains or losses associated with changes in valuations of the company’s marketable securities related to our non-qualified benefit plans and other non-operating assets.
Appendix
Financial guidance, as well as outlook, trends, expectations and other forward looking statements provided by the company for 2022 and beyond, reflect the company's judgment based on the information available to the company at the time of this release. The company's 2022 financial guidance and outlook beyond 2022 reflect what the company currently anticipates will be the impacts on the company from the global COVID-19 pandemic (including related effects on the broader economic environment), based on what the company understands today and what the company has experienced to date. However, the company cannot predict how the pandemic will evolve or what impact it will continue to have, including the potential impact of another variant of COVID-19, another surge of cases, or a prolonged recovery period, and there can be no assurance that the company’s underlying assumptions are correct. As discussed more fully in the company’s Form 10-K and in the recent Form 10-Q, and among other factors, disruptions to the company’s operations or those of its customers, supply chain and logistics challenges, effects on the labor market and our workforce, including labor shortages, vaccine mandates and other evolving government requirements, additional liabilities, disruptions in the financial markets and inflation, impacts on programs or payments, and changes in our customers' priorities, resources and requirements, relating to the global COVID-19 pandemic, today and as it may evolve, can be expected to affect the company’s ability to achieve guidance or meet expectations. In addition, global events, such as the conflict in Ukraine, inflation, and the government budget, appropriations and procurement priorities and processes can impact our customers, programs and financial results. These events, priorities and processes, including the timing of appropriations and the occurrence of an extended continuing resolution and/or prolonged government shutdown, as well as a breach of the debt ceiling, extraordinary measures taken in connection with a breach, changes in support for our programs, or changes in federal corporate tax or securities laws and regulations, can impact the company's ability to achieve guidance or meet expectations.
Non-GAAP Definitions

Non-GAAP Financial Measures Disclosure: This presentation contains non-GAAP (accounting principles generally accepted in the United States of America) financial measures, as defined by SEC Regulation G and indicated by a footnote in this presentation. Definitions for the non-GAAP measures are provided below and reconciliations are provided in this presentation, except that reconciliations of forward-looking non-GAAP measures are not provided because the company is unable to provide such reconciliations without unreasonable effort due to the uncertainty and inherent difficulty of predicting the occurrence and financial impact of certain items, including, but not limited to, the impact of any mark-to-market pension adjustment. Other companies may define these measures differently or may utilize different non-GAAP measures.

Transaction-adjusted net earnings: Net earnings excluding impacts related to the company’s IT services divestiture, including the gain on sale of the business, associated federal and state income tax expenses, transaction costs, and the make-whole premium for early debt redemption, as well as MTM benefit (expense) and related tax impacts. This measure may be useful to investors and other users of our financial statements as a supplemental measure in evaluating the company’s underlying financial performance by presenting the company’s operating results before the non-operational impact of divestiture activity and pension and OPB actuarial gains and losses. This measure is also consistent with how management views the underlying performance of the business as the impact of the IT services divestiture and MTM accounting is not considered in management’s assessment of the company’s operating performance or in its determination of incentive compensation awards. Transaction-adjusted net earnings is reconciled in the “Non-GAAP Reconciliations – Transaction-adjusted net earnings and Transaction-adjusted EPS” table within this Appendix.

Transaction-adjusted EPS: Diluted earnings per share excluding the per share impacts related to the company’s IT services divestiture, including the gain on sale of the business, associated federal and state income tax expenses, transaction costs, and the make-whole premium for early debt redemption, as well as MTM benefit (expense) and related tax impacts. This measure may be useful to investors and other users of our financial statements as a supplemental measure in evaluating the company’s underlying financial performance per share by presenting the company’s diluted earnings per share results before the non-operational impact of the IT services divestiture and pension and OPB actuarial gains and losses. Transaction-adjusted EPS is reconciled in the “Non-GAAP Reconciliations – Transaction-adjusted net earnings and Transaction-adjusted EPS” table within this Appendix.

Organic sales: Total sales excluding sales attributable to the company’s IT services divestiture. This measure may be useful to investors and other users of our financial statements as a supplemental measure in evaluating the company’s underlying sales growth as well as in providing an understanding of our ongoing business and future sales trends by presenting the company’s sales before the impact of divestiture activity. Organic sales is reconciled in the “Non-GAAP Reconciliations – Organic Sales” table within this Appendix.

Segment operating income and segment operating margin rate: Segment operating income, as reconciled in the “Non-GAAP Reconciliations – Segment Operating Income” table within this Appendix and segment operating margin rate (segment operating income divided by sales) reflect the combined operating income of our four segments less the operating income associated with intersegment sales. Segment operating income includes pension expense allocated to our sectors under GAAP and excludes FAS pension service expense and unallocated corporate items. These measures may be useful to investors and other users of our financial statements as supplemental measures in evaluating the financial performance and operational trends of our sectors. These measures should not be considered in isolation or as alternatives to operating results presented in accordance with GAAP.

Adjusted free cash flow: Net cash provided by or used in operating activities, less capital expenditures, plus proceeds from the sale of equipment to a customer (not otherwise included in net cash provided by or used in operating activities) and discretionary pension contributions and the after-tax impact of discretionary pension contributions. Adjusted free cash flow includes proceeds from the sale of equipment to a customer as such proceeds were generated in a customer sales transaction. It also includes the after-tax impact of discretionary pension contributions for consistency and comparability of financial performance. This measure may not be defined and calculated by other companies in the same manner. We use adjusted free cash flow as a key factor in our planning for, and consideration of, acquisitions, the payment of dividends and stock repurchases. This non-GAAP measure may be useful to investors and other users of our financial statements as a supplemental measure of our cash performance, but should not be considered in isolation, as a measure of residual cash flow available for discretionary purposes, or as an alternative to operating cash flows presented in accordance with GAAP. Adjusted free cash flow is reconciled in the “Non-GAAP Reconciliations – Transaction-adjusted Free Cash Flow” table within this Appendix.

Transaction-adjusted free cash flow: Net cash provided by or used in operating activities, less capital expenditures, plus proceeds from the sale of equipment to a customer (not otherwise included in net cash provided by or used in operating activities), the after-tax impact of discretionary pension contributions and cash paid for federal and state taxes and transaction costs associated with the IT services divestiture. Transaction-adjusted free cash flow includes proceeds from the sale of equipment to a customer as such proceeds were generated in a customer sales transaction. It also includes the after-tax impact of discretionary pension contributions and cash paid for federal and state taxes and transaction costs associated with the IT services divestiture for consistency and comparability of financial performance. This measure may not be defined and calculated by other companies in the same manner. We use transaction-adjusted free cash flow as a key factor in our planning for, and consideration of, acquisitions, the payment of dividends and stock repurchases. This non-GAAP measure may be useful to investors and other users of our financial statements as a supplemental measure of our cash performance, but should not be considered in isolation, as a measure of residual cash flow available for discretionary purposes, or as an alternative to operating cash flows presented in accordance with GAAP. Transaction-adjusted free cash flow is reconciled in the “Non-GAAP Reconciliations – Transaction-adjusted Free Cash Flow” table within this Appendix.

</table>

1. The deferred state tax impact was calculated using the company’s blended state tax rate of 5.25 percent and is included in Unallocated corporate expense within operating income.
2. The federal tax impact in each period was calculated by subtracting the deferred state tax impact from MTM benefit (expense) and applying the 21 percent federal statutory rate.
3. The state tax impact includes $62 million of incremental tax expense related to $1.2 billion of nondeductible goodwill in the divested business.
4. The federal tax impact was calculated by applying the 21 percent federal statutory rate to the adjustment items and also includes $250 million of incremental tax expense related to $1.2 billion of nondeductible goodwill in the divested business.
